The main symptoms of coronavirus (COVID-19) are:

- A high temperature – this means you feel hot to touch on your chest or back (you do not need to measure your temperature)
- A new, continuous cough – this means coughing a lot for more than an hour, or 3 or more coughing episodes in 24 hours (if you usually have a cough, it may be worse than usual)
- A loss or change to your sense of smell or taste – this means you've noticed you cannot smell or taste anything, or things smell or taste different to normal

To protect others, do not go to places like a GP surgery, pharmacy or hospital if you have any of these symptoms. Get a test to check if you have coronavirus and stay at home until you get your result.

As the evidence is changing, we advise that you regularly check the [www.gov.uk](http://www.gov.uk) advice link.
